

AIR NEW ZEALAND

Airport Handling Notice

Subject title:	Camping Stoves & Xmas Crackers	Number: 33/02
Date:	20 December 2002	
Effective from:	1st January 2003	
Manual Reference:	International Passenger Handling Manual B 2-4/B2-2 National Customer Services Manual B 2-6/B2-2	
Applicability:	All Operations - Link, Shorthaul and Longhaul	

The carriage of liquid fuel camping stoves and fuel containers has caused problems for both airport personnel and passengers for some time. After considerable discussion, IATA has provided guidelines for the uplift of these articles and these will be included in the next edition of the IATA DGR.

AIR NEW ZEALAND

Carriage of Camping Stove and Accessories in Checked Baggage

I (name).....confirm that I have taken the following precautions to ensure the camping stove and/or any fuel containers in my checked baggage is safe for travel, and are no longer considered dangerous goods.

Please tick the boxes that apply

- 1. I have drained all flammable liquids from the stove, tank or fuel container and allowed it to drain for at least one hour, **and**
- 2. I have allowed the tank to be open to the air to ventilate the tank for at least six hours **and**
- 3. I have securely fastened the cap and wrapped the stove or fuel container in an absorbent material such as paper towel and placed it in a polythene or equivalent bag **and**
- 4. I have sealed the top of the bag with an elastic band, string or equivalent.

OR

- 1. I have drained all flammable liquids from the stove, tank or fuel container and flushed these with a vegetable cooking oil or equivalent product to nullify the hazard of the contents **and**
- 2. I have allowed the tank to drain of all residual liquids **and**
- 3. I have securely fastened the cap and wrapped the stove, tank or fuel container in an absorbent material such as paper towel and placed it in a polythene or equivalent bag **and**
- 4. I have sealed the top of the bag with an elastic band, string or equivalent.
